How to use the Haematocrit Reader.

How to use Reading Scale
1. Remove the capillary tubes from the rotor head;

2. Place the capillary tubes on grooves of tubes holder carefully; let the extreme end (red blood cells) of capillary tubes reach the straight line (# 3) on right hand of the platform;

3. Move the tubes holder (#2) to the position where the extreme end of Leucocyte (#9) meets the diagonal line (#4) on platform;

4. Move the adjustable bar (#5) to meet the demarcation (#7) place where separates the Leucocyte and red blood cells;

5. The percentage of HCT then can be read directly from the scale (#8) at upper hand of the reader scale.
